RESIDENTIAL ALARM COMMUNICATORS

TG-1 EXPRESS LTE

The TG-1 Express, Telguard's flagship product, is a universal cellular communicator that works with almost any alarm panel. Ideal solution for homes without landlines.

- Supports HomeControl Flex for remote arming, disarming, and more.
- Uses the power and backup battery from the panel.
- Power and dial capture over a single cable for reduced installation time.
- Available in AT&T and Verizon models.

TG-1B LTE

The TG-1B is a wireless alarm communicator solution that works with almost any alarm panel. This bundle works great in homes without traditional telephone service.

- Supports HomeControl Flex for remote arming, disarming, and more.
- Bundle includes the TG-1, transformer, and battery.
- Operates on the AT&T LTE network.

TG-4/TG-4B LTE

The TG-4 transmits alarm signals over the nationwide cellular networks if the telephone line has been disrupted or compromised.

- Serves as cell only, primary, or backup communicator for residential and commercial applications.
- Auto format detection for a true plug-and-play set up.
- TG-4B includes battery.
- Available in AT&T and Verizon models.

INTERACTIVE

HOMECONTROL FLEX

HomeControl Flex™ allows homeowners to remotely control their security panel, and integrate it with smart home products including Alexa and Arlo cameras.

- Generates additional recurring monthly revenue while providing an economical remote service offering for end users.
- End user portal and mobile app are customizable with dealer's logo.
- Integrate Arlo to view event-triggered clips & live video.
- End-users can control multiple properties with the Sites feature, using a single login.

COMMERCIAL ALARM COMMUNICATORS

TG-7 LTE

The TG-7 provides primary or backup cellular communication solutions for commercial, retail, and industrial markets.

- Provides security supervision with automatic self-test and system trouble outputs.
- Supports multiple alarm formats.
- Available in AT&T and Verizon models.

TG-7A LTE

The TG-7A provides cellular solutions for finance and high value retail industries. Ideal for banks, credit unions, jewelry stores, and pawn shops.

- Attack-resistant, locking, metal enclosure.
- UL Listed for Bank, Safe, and Vault usage.
- Supports multiple alarm formats.
- Includes tamper switch, providing open door alerts.
- Available in AT&T and Verizon models.

COMMERCIAL FIRE COMMUNICATORS

TG-7FS LTE

The TG-7FS is designed specifically for commercial fire systems, meeting UL 864 requirements for sole, primary, or backup path communications.

- 5-min. or 60-min. supervision available.
- 6-hour and daily self-test options.
- Compliant with NFPA 72 2019 and prior.
- Available in AT&T and Verizon models.

COMMERCIAL & FIRE UPGRADE BOARDS

TG-7UBL

The TG-7UBL makes upgrading any 3G/CDMA Telguard TG-7 series communicators to LTE easy and very affordable - simply replace the existing circuit board with a new TG-7UBL.

- Can use existing connections for easy upgrade without having to replace enclosure or power supply.
- An affordable way to increase longevity of a TG-7 series unit.
- Available in AT&T and Verizon models.

TG-PEM

The TG-PEM (Power and Expansion Module) accessory mounts inside TG-7 and TG-7FS communicators.

- Powers the TG-7FS from the fire panel (accepts 12 or 24VDC); no electrician needed.
- Universal expander adds up to 8 dry contact inputs per TG-PEM; can also be used to interface with a panel in lieu of a DACT.

PANEL UPLOAD/DOWNLOAD

TELGUARD VIRTUAL MODEM

Universal upload/download capability built into all LTE communicators for residential, commercial, and fire applications.

- Works with existing OEM downloading software.
- Seamlessly connects downloading application and panel through Telguard's secure cellular network.

ARLO WIRE-FREE VIDEO

ARLO GO VIDEO SYSTEM

The world's first and only LTE, 100% wire-free, weather-resistant, mobile HD security camera. No Wi-Fi? No power? No worries!

- Perfect for construction sites, RVs, marinas, or vacation homes - anywhere with Telguard LTE coverage.
- Live stream and recordings are captured in HD.
- Built-in SD card slot for local backup storage.
- Wide-angle PIR motion sensor.
- Available in AT&T and Verizon models.

ARLO PRO & PRO 2 CAMERAS

100% wire-free, weather-resistant, HD smart security cameras with sound detection.

- Arlo Pro (720p), Arlo Pro 2 (1080p).
- Rechargeable batteries, with optional AC power or solar panel.
- Integrates with HomeControl Flex.
- Two-way audio with built-in speaker and microphone.

ARLO VIDEO CAMERA

100% wire-free, weather-resistant, HD smart security camera.

- Economical option for video surveillance.
- Integrates with HomeControl Flex.

ARLO BASE STATION

Hub for the Arlo video system.

- Works with Arlo Pro 2, Arlo Pro and Arlo video systems.
- Optional local storage available.
- Access to up to 5 cameras, with 7 days of motion & audio triggered recordings for free.

TELGUARD ACCESSORIES

We offer a full line of accessories such as antennas and cables needed to boost signal strength and provide a way of locating the communicator away from the panel, if needed.

- EXDL-0 Omni-directional antenna for LTE.
- HGDL-0 High gain directional antenna for LTE.
- Low loss cables in various lengths.
- Batteries, transformers, tamper switch, and more.

POWER PROTECTION / POWER SUPPLY

TG-PP151

Comprehensive power protection for everyday applications.

- 1 outlet.
- Safeguards from harmful effects of surge energy.
- Three stages of protection.
- Advanced filtering.

TG-PP158/208

Comprehensive power protection for everyday applications.

- 8 outlets.
- 15A/120V (TG-PP158) & 20A/120V (TG-PP208).
- Patented, non-sacrificial, multi-stage surge suppression technology.
- Cost-effective, comprehensive power protection and conditioning.

TG-UPS1000/2000/3000

Standalone UPS solutions that deliver clean, continuous power via online double conversion technology.

- True sine wave output.
- Controllable receptacles. Hot swappable internal batteries.
- Available in 1000, 2000, and 3000 VA configurations.
- Optional SNMP card to monitor and manage the UPS via the network.
- Extended Battery Packs available for all Telguard UPS solutions (TG-BPX1000/2000/3000).
